

HOW TO START A STARTUP!

Date

- * 30% of startup tips in this are going to be generally applicable.
- * Goal with the hypergrowth.

The four areas of success.

- | | |
|------------|--------------|
| ① Ideas. | ③ Team. |
| ② Product. | ④ Execution. |

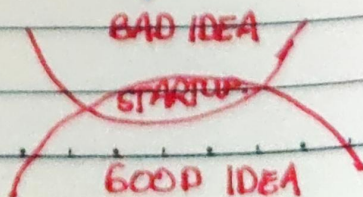

* You feel compelled by a particular problem and starting a startup is the best idea.

- * Passion should come first and then the startup.

① IDEA:

- * A bad idea is really bad.
- * Great companies have great ideas.
- * Founders themselves wanted that thing & was not a general idea.
- * Size and the growth of the market, growth strategy defensibility.
- * Strategy.
- * Think of the long-term thinking.
- * The idea will broaden out as you are going to continue.
- * Build up a company that is going to be inescapable.
- * Idea comes first and then the startups.
- * Company should have a startup should be mission oriented.
- * mission driven companies, tend to attract much more customers and create a more driven team of people.
- * Often ideas look terrible at the beginning.

* Find a small market in which you can get a monopoly and then expand.

* Right on one side and then crazy on the other side.

* Idea, not people are working out.

* Small market and then expand there.

* FOCUS ON THE
GROWTH-MARKET.

* Initiation that which markets are
going to be growing rapidly than the
older people do.

Reason: customers
are desperate for
solutions, so they put
up in everything.

* Look up for a market that is going to
grow really fast.

WHY NOW?

* Best that if you yourself needs it.

* Talk to the customer.

* Easy to explain with a small number of words.

1. Think about new
ideas.

2. meet potential
cofounders.

* Think about the market first and what people actually want
and then continue afterwards so that you can adjust relative to
your startup idea.

② PRODUCT:

* Customer support and copyright explaining the product.

* Great Idea → Great Product → Great Company.

* Build a great product and create something that users love.

* Talk to users.

* Build something that a small number of users love but a large
number of users like.

users

* much easier to expand from something that a less number of people love to what more number of people love.

* Find a small number of users and make them feel that you really love.

* How do we get that growth then? —

- word of mouth (Consumer/Enterprise)
- Sales and marketing
- Organic growth.

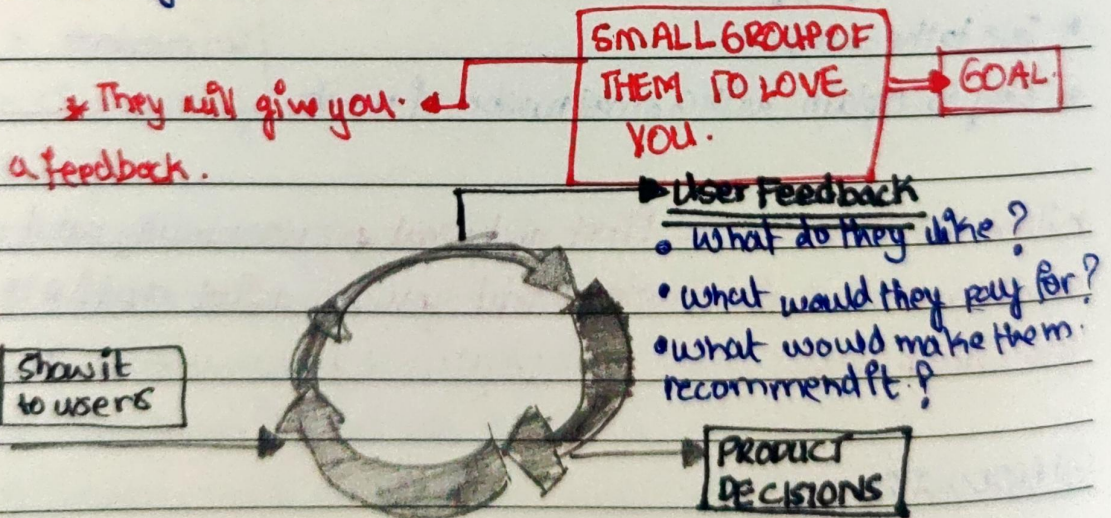

* Start with things that are simple. (Facebook, Instagram). The first prototypes were really simple.

* Being simple forces you to do one thing extremely well.

* Focused and it takes them to work and fix upon the idea.

* Go and recruit the initial users by hand.

* Do things that don't scale.

* As tight the feedback loop, the better it gets. and that is a plus point for the software startups.

* The reason why the tech companies are able to become successful is because of the tight feedback loops.

* Sales and the customer support by yourself in the early days.

METRICS $\Rightarrow$ FOCUS ON GROWTH.

- * Total registrations.
- * Active users.
- * Activity levels.
- * Cohort Retention
- * Revenue
- * Net Promoter Score.

STARTUPS ARE
FOCUSED ON
GROWTH AND
ARE GROWTH-
ORIENTED.

WHY START A STARTUP?

- * It's a lot of hard work and quite stressful.
- * Responsibility, fear of failure.
- * If something important comes up, you have to think what it feels like.
- * For a founder you are committed and are going to leave.

You'll be the BOSS.

Flexibility

You'll make more and have more money.

- * Financial rewards are strongly correlated with the impact.

- * Adding a late stage feature to an established company means you get a force multiplier from :-

- ① massive user base
- ② Existing infrastructure
- ③ working with an established team.

GOOGLE'S
EXAMPLES

The Best Reason: You Can't Not Do it

① Passion: You need to do it.

- You'll need passion to endure the struggle
- * You'll need passion to effectively recruit.

② Aptitude: The world needs you to do it.

⇒ The world needs it

- Otherwise do something that the world needs.

⇒ The world needs you.

- It's bad for the world if you just out compete a team with more aptitude.

- The world needs you somewhere - find where.

FORCE TO PUSH YOUR IDEA INTO THE WORLD
