How to build products, Get started, Doing things that don't scale

* On demand delivery door network.

* How to build technology for small business owners.

* How to test the hypothesis?

⇒ In the very first phase, it is about testing your idea and checking out that if it is something that people really want.

⇒ It's okay to hack things together.

⇒ Hacking together all the solutions to sleep off the guard.

* Doing things that don't scale allows you to become an expert in your own business.

* Customers, restaurants, dispatching.

* Automated solutions, dispatch energy system.

manually.
Email and
personalize
your emails

Three outcomes from DoorDash.

① Test your hypothesis

② Launch Fast

③ Do things that don't scale. ⇒ Help you to understand the scalability of your business.

↳ On demand pool for independent contractors.

* Just focus on serving that demand.

* How do you serve for any local owner.

* You can do things that don't scale.

Three places to leverage your advantage:-

- 1) Finding your first users.
- 2) Turning those users into champions.
- 3) Finding product/market fit.

1- There's no silver bullet for user acquisition.

1- what are the pain points of the customer.

2- Do whatever it takes to bring the user's back.

**BRING YOUR
CUSTOMERS**

* Avoid giving your product for free.

↳ A champion is a user who talks about and advocates for your product.

* You really need to see that the great companies are like the champions users.

↳ Delight your users with the experience they will remember!

* Talk to your users as long as possible.

* The Feedback loops:-

- ① Run customer service as long as possible.
- ② Proactively reach out to current and churned customers.

③ Social media / communities.

DON'T MAKE
THE USER LEAVE
YOU!

* Problems are inevitable, do whatever it takes to make them right.

⇒ Little bit of / most frustrated customers. Turn out to be the champions.

The product you launch with will not be the product that finds the market fit.

* Optimize for speed over scalability / clean code.

Rule of Thumbs:

* Only worry about the order of the next magnitude.

* Necessity is the mother of invention: You'll find a way to make it work.

* Bumps are just speed up.

Do things that don't scale as long as you possibly can.

* Youtube stars, reddit community.

PROMOTIONS: / PRESS

* Journalists are out there finding the audience *

* Who do you want to reach?

↳ Press should have targetted audience and goals.

* Investors, customers, industry.

- * Press is not a scalable user acquisition strategy.
- * Keep contacts fresh.
- * Regular heart beat of news.
- * Golden rule.

Date

- * Twitch was like an ESPN for gaming.
- * kept people think about re gaming.

What is a story?

Types of stories:

- Product launches.
- Fundraising.
- Milestones/metrics.
- Business overviews.
- Stunts.
- Hiring announcements.
- Contributed articles.

- * Think about your story objectively.
- * You don't have to be original, just original enough.

FURTHER READS

- The Burned out Blogger's guide to PR.
- Trust me, I am lying.

- * Think about what else has been written out and what are the actual mechanics.

Mechanics of a story

- ① Think of a story.
- ② Get introduced.
- ③ Set a date (4-7 days in advance)
- ④ Reach out (get a commitment to present)
- ⑤ Pitch.
- ⑥ Follow up.
- ⑦ Launch your news!

* Introduce you to the hiring and the evolutionary perspective.

* Have the bullet points and make through to the conversation.

PR Firms

- * Firms can only help with contacts (maybe)
- * Firms can't generate stories.
- * Firms are expensive.
