

LECTURE: 6

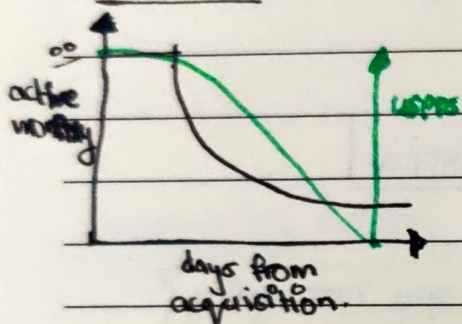

Date _____

GROWTH (Alex Schultz)

- * monopoly in the small niche market.
- * Growth, growth-hacking, marketing.

What matters the most?

Retention.

- * If you end up with a curve parallel to the x-axis, you have a viable business.
- * we understand the future of the business through the retention.

- * Focus on getting the market fit.

Figure it out

- * Dimensional reasoning & - You look at the dimensions that are involved in the problem.
- * How many people are there as compared to the people signed up on the site.
- * Need to have the tools to see that who put there is comparable.
- * Cohort $\Rightarrow$ gives a higher retention.

How do you attack operating growth:-

- * If you have a startup, you should not have a growth team.
- * person leading the company, needs to make sure about the growth rate.
- * Different components of the team, leaders work to grow a specific thing.

INFLUENCE

→ is a way to control the people.

Date

* You have the north star and define that as a leader.

* The differences between the ACIUs and CIUs have to be thought and considered, whenever it comes for the growth-retention rates.

Marginal User / Magic Moment

1) Chirpoff talking about growth at Facebook and vPooni talking about the growth button.

⇒ SEE YOUR FRIENDS

→ Show you the people you want to follow, connect as soon

as possible.

⇒ You can move up with the greater asymptotes.

One person you need to focus on is a marginal user. One person who doesn't get a notification in a given day.

* Building the product ⇒ Focus on the customers.

* Think about the user and work on that for the growth.

North Star

→ That one metric is something that the entire company is going to work about.

→ Pick the one, when they see you.

* Everything has to go on from the top.

TACTICS:

* You have to work:

1. Internationalization

Date

- * Is an important barrier, you need to drop down.
- * Any social user - to get money
- * Focused on the 10 friends in the 14 days.
- * Take the time to build it in a scalable way.
- * Community transaction platforms.
- * Prioritizing the right languages.

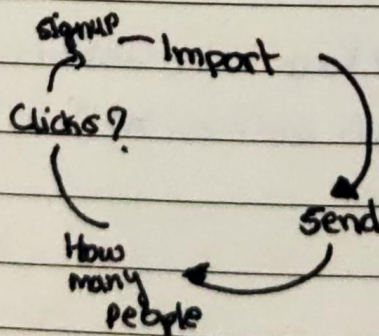

2. Virality

- * Viral loop $\Rightarrow$ Book to learn about marketing
- * OGILVY ON ADVERTISING.

$\hookrightarrow$ Three things to consider when thinking about virality:

- 1) Payload $\Rightarrow$ How many people you can hit with virality.
- 2) Conversion Rate.
- 3) Frequency.

- * Went and built about products.

- * You should look at the invite flow and think about the retention.

3. SEO (Search Engine Optimization)

- * Research $\Rightarrow$ Book for optimizing the correct word:

- $\hookrightarrow$ What do people search for when it comes to the correct doc.
- $\hookrightarrow$ How many people search for it?

Date

- * How many people are making for it.
- * How valuable it is?

BEST KEYWORDS
LINKS

- * The most effective communication you can do is ~~the~~ through notifications.
- * What notification you should be sending?
- * Different marketing strategies.
- * Trigger based messages and emails.

"A good plan executed violently today is better than the perfect plan tomorrow."
