

LECTURE: #3

Date

* Paul Graham

⇒ Startups are very competitive.

⇒ Learning to suppress the impulse.

⇒ List of Stuff to Remember for Startups

① Startups are weird and if you follow your instincts and then they would leave you astray.

② You can trust your instincts about the people.

③ Pick people the way you are picking your friends.

④ You do not exceed in startup with expertise. You need expertise in users/consumers.

↳ UNDERSTAND YOUR CUSTOMERS

Playing House

* Try and figure out what the exams questions would be in advance and work on their answers.

* In order to make your startup grow, make something that users really love and they are ready to grow it.

*

⑤ Gamifying the system stops working, if you are gonna start a startup.

↳ USERS ARE LIKE SHARKS!

⇒ How do you win at each type of the work and what do you want to win by doing?

↳ Startups are all consuming.

→ There is an opportunity cost.

The nature of the problems change

* When you think, universities are defunct, they will lose integrity?

* You need to understand the users, which comes by practice

* Do not start a startup in college.

* make them take off as the role of the founder.

⑥ Starting a startup will change you as a person.

↳ The expert turns about the future through the experience.

⇒ What do you need in college?

↳ Idea.

↳ Co-founders.

HOW TO GET STARTUP IDEAS?

↳ If you think about the startup ideas, you will get bad ideas.

⇒ Stop thinking about startup ideas from a plausible mind.

⇒ You will think about.

⇒ Think of your brain in an unconscious mind.

Learn alot about things that matter

Work on problems that interest you.

GETTING IDEAS
UNCONSCIOUSLY

With people you like and respect.

* Become good at some technology.

* Work on things that stretched you.

* Real problems are interesting.

* Gratifying your interest is the best way to live.

* To get yourself with the some form of technology.

* Learn powerful things in college.

↳ Domain expertise are something.

* JUST LEARN.

Q. How can a non-technical founder effectively contribute to a startup?

* If it's not a pure technology startup.

* Non-technical person doing sales and working on the other business.

→ The best way to learn to try and start.

* Let what they are good at.

* Females have a harder time raising money.

* The growth graphs must be stupendous and they don't have genders.

→ Setting up a situation that keeps you to work.
